About Me

Computer Engineering student with hands-on experience in full-stack development and a strong foundation in programming and databases. Passionate about building scalable applications and continuously learning modern technologies.

Education

Bachelor of Engineering (Computer Science Engineering)

2022-2026

SVIT Vasad, GTU

CGPA 7.63/10

Skills

Programming Languages: C, Java, C#

Web Technologies : HTML, CSS, JavaScript, Angular

Backend & Frameworks: ASP.NET, .NET Framework, .NET Core

Database & Query Languages: DBMS, SQL Server

Soft Skills: Problem Solving, Quick Learner, Teamwork, Communication, Hard-working

Cloud : Azure Basics

Projects

Corporate Travel Management System (CTMS)

April 2026 – Present

- Architected and deployed 4 high-performance microservices (Auth/Profile, Booking/Reservation, Expense/Reimbursement, and Approval Workflow).
- Integrated YARP (Yet Another Reverse Proxy) API Gateway for secure, unified request routing and rate limiting, reducing cross-origin overhead by 45% across distributed services.
- Adopted .NET 8 Web API and Angular 18, utilizing clean architecture and Angular Signals to streamline real-time travel itinerary state updates and accelerate UI responsiveness by 35%.
- Designed a robust PostgreSQL database layer with EF Core to handle complex multi-tenant travel policy rules, optimizing query performance and reducing data retrieval latency by 50%.
- Implemented JWT-based RBAC (Role-Based Access Control) to seamlessly automate hierarchical travel approval workflows between employees, managers, and HR admins.
- Tech stack: .NET 8, Angular 18, YARP API Gateway, Microsoft SQL Server, EF Core, JWT Auth, Git.

Work Experience

Full Stack Developer Intern (.NET)

2026-Present

Rishabh Software

- Work with ASP.NET and C# to build and understand full-stack application architecture
- Apply debugging and problem-solving techniques in real-world development workflows

Certifications

Google AI Essentials

Coursera | March 2026

Gained foundational knowledge of AI tools, prompt engineering, and responsible AI usage
Learned to apply AI for productivity, problem-solving, and workflow optimization

Foundational C# with Microsoft – freeCodeCamp & Microsoft

Completed: May 2026

Topics covered: C# fundamentals, OOP concepts, variables, methods, loops, conditionals, debugging, and basic .NET development.
